

Education Volume License Agreements

Clearly simple software licensing.

Key Features

- Convenient and economical
- Discounts start with as few as 10 units*
- Home use rights included for some products
- Ideal way to manage your software investment

*Volume requirements vary by product.

Whether your school is large or small, the Apple Education Volume License Agreement (EVLA) provides an easy and economical way to purchase outstanding Apple software such as AppleWorks (formerly ClarisWorks) or the Mac OS.

With the EVLA, you license the right to use Apple software on a specified number of computers at your school—you determine how many. The way it works is simple: Choose the software titles you want from the list of Apple products and decide on the number of licenses for each title. Discounts are based on the number of licenses you are purchasing, and volume pricing starts at only 10 units for some products (contact Apple for more specific information). You don't have to be a big organization to get big savings.

The EVLA program gives you three great ways to save. You can purchase new software at volume discounts, upgrade to the latest versions of software you already own, or even trade up from a qualifying competitive product. Each of these options helps to protect your original software investment.

As an added benefit, the EVLA program includes home use rights for some products. Qualified personnel at your school can use their software licenses either at home or at work.

Customized Just for You

Apple recognizes that one size doesn't fit all. That's why each EVLA agreement is custom-created for your specific situation. You can choose any combination of new licenses, upgrades, and competitive trade-ups. You can even include both Windows- and Mac OS-based titles on the same order. And all of them count toward your volume discount.

What You Receive

Apple provides a customized software license certificate that grants the right to use the number of software licenses purchased and acts as proof of ownership in future transactions. This certificate details the terms and conditions of your license. In addition, the volume license agreement number serves as your registration number.

The EVLA certificate also provides a convenient record to help you track and manage your software investment. No more wading through stacks of registration cards or piles of disks looking for serial numbers to verify legality.

Apple has listened to customers and understands that storing box after box of software and documentation can be a problem. The Apple licensing program provides the solution. Instead of forcing you to purchase single boxes of software containing mountains of media, Apple allows you to order just what you need.

If you do need media or documentation, it's best to order that along with the EVLA software license. That way there's no minimum quantity to meet. Later orders must meet a minimum purchase amount.

Ordering Information

For more details, visit our web site at www.apple.com/sales/volumesoftware.

For more information about EVLA, call Apple at 800-747-7483 or fax 408-974-7109.

EVLA Advantages

Easy management

Your licenses are all on a single document, designed to meet your needs. It's easy to track software ownership, versions, number of licenses, and platforms. And because we don't force you into buying retail boxes you don't need, you don't have to figure out how to store them.

Clearly legal software

Our customers tell us they want to use legal copies of software, but it's often hard to manage many computers in multiple locations and make sure each software copy is licensed. The EVLA gives you all the details you need on a single document. It's all in one place so you can be sure you have everything you need.

Cost-effective purchases

The EVLA is the low-cost way to purchase the award-winning Apple software products, with discounts of up to 45 percent. This volume purchase program offers deeper discounts for larger purchases, while maintaining an easily reachable entry level of 10 units* for minimum purchase. It provides all of the advantages of volume purchasing for large or small schools.

Flexibility

Mix and match upgrades, competitive trade-ups, and platforms to achieve discounts. This makes it easier than ever to reach minimum purchase. And because competitive trade-ups and upgrades generally cost less than new software licenses, combining these purchases with new titles can save even more.

Precision

You don't have to buy any predetermined number of licenses. Once you meet the minimum, choose the number that fits your needs rather than buying 10-packs.

Frequently Asked Questions

Which products can I purchase with an Apple EVLA?

You will find that most Apple software products are available for purchase under the EVLA program. If you are interested in purchasing a large quantity of an Apple product that you do not see on a price list, please contact Apple at the phone number listed under Ordering Information.

Do the purchases that I make today count toward future discounts?

No. The Apple EVLA program is designed to provide customers with the lowest possible price for each purchase. You get your discount up front—not over time.

Who can take advantage of home use rights?

All qualified personnel are eligible to take advantage of home use rights when they are available for a product. If a faculty, staff, or administration member (but not an enrolled student) is the primary user of a computer with licensed software installed, the primary user can run the software on his or her home computer for work use at no additional charge.

What can I use as proof of purchase for upgrades and competitive trade-ups?

Your best proof of purchase is your previous Apple EVLA certificate. In addition, serial numbers, registration numbers, manual covers, original disks, or copies of original invoices can all serve as proof of purchase.

How many sets of disks and documentation can I order?

You can order as many sets as you want, up to the number of licenses for a product that you have purchased. However, Apple will only ship to a single location. Most customers choose to purchase at least one set per location. Apple recommends that you purchase at least two sets in order to have a complete backup.
